

# Sartoclear® Depth Filter Sheets for Food & Beverages

Filter Sheets for Clarification and Microbe-retentive filtration

## Description

Sartoclear® filter sheets are used for clarification and microbe-retentive filtration in the food and beverage industry.

The sheets are manufactured from high grade, natural raw materials such as cellulose and diatomaceous earth and can be available in various sizes.

## Total Throughput

The structure of the cellulose forms a three-dimensional matrix. The Sartoclear® F&B filter sheets have a large void volume of up to 85%. These features ensure outstanding total throughput and thereby cost-effective filtration.

## Protection

The positive Zeta potential of the Sartoclear® F&B filter sheets strengthens the mechanical retention capacity and clarifying effect, allowing additional adsorption of minute negatively charged particles and colloids. This ensures that downstream filters are effectively protected and also lowers overall costs of consumables.

## Applications

The Sartoclear® F&B filter sheets are especially developed for Wine, Beer, Fruit juices and Spirits applications.

## Flexibility

Filter sheet systems can be optimally adapted to the flow rates required for each application by raising or lowering the number of sheets installed.

## Quality

Sartoclear® F&B are manufactured according to a DIN EN ISO 9001:2000 certified quality management system. All Sartoclear® F&B products are according to the Quality standards for food production set by the German LFGB and US FDA.

## Ordering Information

Grade	Nominal retention (µm)	Thickness (mm)	Ash content (%)	Water flow (L/m <sup>2</sup> /min)	Size (mm)	Article number
